

# Texas Primary Care and MedProvider Will Merge On July 1, 2017

Texas Primary Care (TPC) and MedProvider will merge to become Baylor Scott & White Hospital Medicine – Dallas (HMD) on July 1. TPC and MedProvider have been the primary hospitalist groups caring for Baylor University Medical Center at Dallas (BUMC) patients for more than 20 years. **Combined, the hospitalist team will have 109 providers caring for more than 400 patients daily.**

## Key changes include:

- **Centralized admissions**

The transfer center and emergency department will no longer have to call two different groups to admit a patient to BUMC. One main number for hospital admissions will be used to admit all patients: 214.820.9056.

- **Care**

Nurses on the floor will have one number to call when the patient is on the HMD service regardless of the specific provider: 214.820.3000.

- **Efficiency**

Hospital medicine providers will be assigned to round on floors geographically, better enabling relationships among the entire patient care team.

For more information on the merger contact **Carolyn Quan at 214.821.1177.**
