A Continuing Medical Education event designed for Medical, Radiologic and Surgical Oncologists, Pulmonologists, Cardiothoracic Surgeons and Diagnostic Radiologists.

SATURDAY
OCTOBER 13, 2012
Baylor Sammons Cancer Center
10th Floor Conference Center
3410 Worth Street • Dallas, Texas 75246

CONFERENCE OVERVIEW
The North Texas Multidisciplinary Lung Cancer Symposium will focus on recent advances in lung cancer screening, therapy, and research. Critical updates on the information that was discussed this year at ASCO, ESMO and other international meetings will be discussed. The expert faculty will present key data in support of imaging in screening, genetic evaluation, minimally invasive surgery, combined modality therapy and the integration of biomarkers for personalized therapy. Discussion will also include recent clinical trial results and impact on patient care.

The format of the conference will include didactic lectures, open discussion and case-based learning.

STATEMENT OF NEED
Lung Cancer is the leading cause of cancer-related death in the United States. Significant progress has been made in the areas of prevention, early detection, diagnosis and treatment. Applying strategies that capitalize on recent advances can positively impact patient outcomes by reducing potential morbidity and improving quality of life.
