Course Description

Management of IBD is a complex, multidisciplinary process, made all the more difficult by the clinical heterogeneity of IBD and the lack of comparative effectiveness studies. Numerous studies have demonstrated practice variation, for example in the use of anti-inflammatory therapies, vaccinations, and surgery. The practice variation points to areas of potential improvement in the quality of IBD care. This conference will present the latest evidence-based recommendations on several aspect of IBD care, with the goal improving health outcomes in this large patient population.

Location
Baylor University Medical Center
Roberts Hospital, 17th Floor Conference Center
3500 Gaston Avenue, Dallas, TX 75246
Parking vouchers will be provided.

Faculty

Themitocles Dassopoulos, MD
Director, Baylor Center for Inflammatory Bowel Diseases
Baylor University Medical Center at Dallas
