Instructions for authors

Baylor University Medical Center Proceedings welcomes research articles, review articles, case studies, and editorials from Baylor or non-Baylor authors. Manuscripts containing Baylor data are particularly desired. Send all manuscripts and editorial correspondence to William C. Roberts, MD, Editor in Chief, through the editorial office: Baylor Scientific Publications Office, 3500 Gaston Avenue, Dallas, Texas 75246; phone: 214-820-9996; fax: 214-820-4064; e-mail: cynthiao@BaylorHealth.edu.

MANUSCRIPT SUBMISSION

Electronic files: Submit the word processing document by e-mail to cynthiao@BaylorHealth.edu (preferred method) or mail a copy of the complete manuscript and figures to the editorial office with a disk. Large files may be sent using YouSendIt.

Cover letter and attachments: According to journal policies outlined below, list suggested reviewers and discuss potential conflicts of interest in your cover letter and provide as attachments copies of institutional review board approval or exemption, written permission for reprinting tables or figures, copies of any published material that could be considered duplicative, and release authorization forms for photographs.

Schedule: Deadlines for submission are as follows: January issue, September 15; April issue, December 15; July issue, March 15; and October issue, June 15. The editorial office cannot guarantee that any manuscript submitted by these deadlines will be published in the specified issue; variables include the peer review and revision process and the number of articles already accepted.

MANUSCRIPT PREPARATION

Assistance: The Scientific Publications Office staff can assist authors with editing in the manuscript’s early stages, before official submission for peer review. In addition, the office can assist with creating computer-generated graphics and obtaining permission to reproduce previously published material. All services for Proceedings articles are provided free of charge.

Format: Type manuscripts double spaced on one side of the paper, leaving 1-inch margins. Number all pages, including the title page.

Title page: Include on the first page the article’s title; the authors’ names, highest degree(s), and affiliations; and the name, address, e-mail address, and phone number of the corresponding author. Acknowledge any grant support.

Abstract: Provide a one-paragraph double-spaced abstract of 150 to 300 words.

References: Number references according to the order in which they are cited in the text and type them double spaced at the end of the manuscript. Do not use the footnote or endnote functions of word processing software. The numbers in the text should be on line and in parentheses, such as (14, 16, 17). The references should conform to the following style, listing all authors:

Personal communications and unpublished data should be identified in parentheses in the text.

Tables and figures: Number tables and figures in the order in which they are discussed in the text. Include call-outs in the text and place the tables at the end of the document. Figures can be embedded in the text at the end of the document or provided as separate files, with legends in the Word file. Provide enough details in titles, footnotes, and legends so that the tables and figures can be understood apart from the text. Submit photographs as 350-ppi tiff or jpeg files. Submit graphs and diagrams as electronic files (EPS format preferred). Contact the Scientific Publications Office for assistance in preparing graphs and diagrams or for referrals for medical illustration.

Style issues: Use generic names for drugs; capitalize any trade names when they are used. Limit the number of abbreviations in a manuscript to five, and do not abbreviate single words, such as intravenous. Spell out all abbreviations on first usage. Proceedings follows the style guide of the American Medical Association.

Prospective authors are encouraged to read the “Authors’ submission toolkit: A practical guide to getting your research published” (available at http://www.cmrojournal.com/ipi/ih/MPIP-author-toolkit.jsp). The toolkit summarizes tips and best practices to increase awareness of editorial requirements, journal selection, submission processes, publication ethics, peer review, and effective communication with editors.

MANUSCRIPT PROCESSING

Peer review: All manuscripts are subject to peer review by editorial board members or other selected reviewers; however, the final decision as to which articles are published will be made by the editor in chief. At the time of manuscript submission, authors are encouraged to suggest reviewers, within or outside the Baylor Health Care System, and to list any reviewers they feel should not be used because of potential bias. If a manuscript was previously reviewed by another journal, authors should submit those reviews and clearly indicate any revisions that have been made. Such manuscripts will receive expedited processing, since they will not be sent out for re-review.

Editing: All manuscripts will be edited for clarity and conformity to Proceedings’ style. The corresponding author will have the opportunity to review editing either before or at the page proof stage.

Reprints: Authors can order reprints using the form provided through an e-mail link from the printer. Reprints are delivered approximately 4 weeks after the issue comes out. All authors receive a copy of the printed journal, and PDF files of all articles are freely available to the authors and the general public.
Duplicate publication: When submitting the manuscript, provide a copy of any published or submitted article that is similar to what is being submitted to *Proceedings*, so that the editor can judge whether the manuscript in question would be a duplicate publication. Once manuscripts are accepted, authors transfer copyright to Baylor University Medical Center.

Authorship: All authors listed in the manuscript must have participated in the design or analysis of the project. In addition, all authors must review the final text and be prepared to take public responsibility for its content. Other individuals who made contributions should be included in the acknowledgments; the author should get their permission to be acknowledged before the manuscript is submitted.

Ethical treatment of research subjects: For reports of experimental investigations of human or animal subjects, indicate institutional review board approval or exemption within the manuscript. Authors should also explain in the Methods section the procedures followed to obtain informed consent.

Conflict of interest: Grant support for a particular study must be indicated on the title page. In addition, authors must communicate to the editor in the cover letter any affiliations that could be perceived as potential conflicts of interest. Examples include honoraria, educational grants, participation in speakers’ bureaus, expert testimony, patent licensing arrangements, consultancies, and stock ownership.

Use of protected health information: Authors should not refer to patients by name or initials or provide other specific identifying information, such as Social Security number or medical record number. Authors are further encouraged to avoid including extraneous social details about patients. Patient authorization forms are required for all identifying photographs. For a copy of *Proceedings’* full privacy policy, contact the managing editor.

Permissions: Permission is required for reproduction of any material, including figures and tables, that has been published elsewhere. When submitting manuscripts, provide written documentation that permission has been obtained or notify the editorial staff of the need to request permission (providing all necessary source information). For photographs in which the subject can be recognized, submit release authorizations at the time of manuscript submission.

For additional information, please contact Cynthia Orticio, managing editor, at 214-820-9996 or cynthiao@BaylorHealth.edu.
